About This Game

Engage in the craziest war against humans.. as a pigeon! Use famous war tactics such as engagement, avoiding and target fixing to center unlucky people with poo and get points for that.

STORY

The game is about a pigeon angry with humans. Humans did a bad joke to the pigeons, so they will be punished with poo!

GAMEPLAY

The game is a third person shooter. We play as the pigeon and need to bomb environments with poo before moving to the next level.

Levels are unique, as every enemy has unique weapons, also regard how fast a player is, how quick he can react and assess to enemy reactions.

FEATURES

- **Both evil and comic game story** - Use a pigeon to destroy a city with poo.
- **Pigeon sounds by John J. Dick** - The famous actor who voiced Serious Sam.
- **Beautiful cartoon graphics** - You will love to shoot green poo.
- **Split screen coop mode** - Two pigeons is better than one.
- **The dramatic poo cam** - Drive the poo until it hits the target.

GAME WORLD

The game follows the cartoonish style. We have different worlds, which also come with independent and different alternative locations .

no words on how this game is, its just frikin epic!. Really bad unity engine cash grab. Not even playable really in its current state.. This game is the worst.

The controls are terrible. The premise is dumb.
The content is so short that I beat it in my 5 minutes of play time.
Worst game I have played in forever.

<https://www.youtube.com/watch?v=cq2A3OHvDTY>. The games controls are overtly sensitive with no way of chanign them, half the time the game glitches out and throws umbrellas at the pigeon and the other half the buttons to even play the game don't work. The assets are apparently ripped from a Unity pack, the gameplay is atrocious, all in all, don't waste your time.. This game looked to be a fun little time waster and maybe it will be. At this point though it is just a waste of time. Every bug fix thus far has broe something that was previously working. After a dozen tries I finally got some point on the board, more luck than judgement as the only control that worked was poop.
Kind of apt right now, but on a plus note the quit feature now works So I did.

[This review may change if the game ever delivers a game, for now it's just Wonky.](#)

[Finally returned to the 'game' now it has left early access and become a 'full release'. The only full release that works in this game now is the one that passes from the pigeon's rear.](#)

[Controls more broke than they were on Early Access release: Check.](#)

[Settings that don't set anything: Check.](#)

[Tutorial that teaches nothing and seems unquittable: Check.](#)

[I would like to give this game my own special award: Worst Game Ever Released from Early Access.](#)

[I can't though as there still is no Game.](#)

[Maybe in the next patch ?](#)

PLEASE DON'T BUY!. currently (8V17) unplayable, i just played the 1st level of this for recording, could not hit a poor single soul on the street! the mouse sensitivity is out the window (too high) and there are no option to set it. you can easily pull a 180. also, when you poo, the camera flips a 180 so you're pooing behind out and have to find the poor soul on earth. i would love to play this, i know there's some creative protential, but the controls are out the window and there's no options. wtf?! how can you have a game with no option!?. worse then death. An absolutely abysmal game with virtually no redeeming qualities. There is absolutely no reason to get this game. If you do get it, brace yourself for control issues, weak gameplay, limited content, frequent bugs and crashes, and general lack of a good time.. Worst game in my 1400 library. Controls dont work, options dont change.
